Portfolio: <https://jds21171.github.io/My-Portfolio/>

Newly minted Software Engineer from Georgia Tech Coding Bootcamp who specializes in adaptability and innovation. Straight A student willing to learn any language required to succeed in a world filled with ever-changing roles and responsibilities.

Technical Skills & Projects

Technical Skills

- JavaScript (Node, Express, jQuery, Moment, React), HTML5, CSS3, JSON
- NoSQL (MongoDB), SQL (MySQL), AJAX and RESTFUL API's, Docker, Handlebars

Stock Market Portfolio (Project) – <https://project-2-stock-app.herokuapp.com/members>
– <https://github.com/rjsurana/proj-2-stock-app>

- Application that allows users to access stock market information for requested companies, relevant news about companies, as well as a personalized portfolio for each user soon to come.

Role in Project

- I coded the routes to each page as well as utilized our MVC to show appropriate views.
- I ensured our bootstrap kept a clean and consistent UI across all our pages.
- I helped create the handlebars views that would be returned to the user.

Technologies Used

- JavaScript was the main component used for back end, specifically we used Node.js, Express.js, and Passport.js.
- For our front end, we used a bootstrap framework to ensure flexibility and a clean, consistent style.
- We utilized handlebars for our view in our MVC model.
- Lastly, we used Heroku to host our application, with our team pushing code to GitHub daily while using an AGILE method of development.
- For the future, we are figuring out how to incorporate a MySQL server into a Heroku deployed application, so that we can store user login information as well as user portfolio information.

WORK EXPERIENCE

East Cobb Test Prep – May 2019-Present

Marietta, GA

Full-time - Tutor for SAT, ACT, GRE, individual subject tutoring company

- Boosted student knowledge for all ACT subject (Math, Science, Reading, English) by up to 5 extra points.
- Facilitated learning for all SAT subjects (Math, Reading, English) and helped to increase scores.
- Aided students in math ranging from geometry & trigonometry up to pre-calculus and Calculus I.
- Advanced students in science ranging from physics to General Chemistry to Biology.

Alpha Chi Omega, Beta Sigma House – January 2017-May 2019

Athens, GA

Part-time – Do it all employee

- Was recognized for my loyalty and dedication to excellence by my boss before graduation.
- Communicated daily with the house mom to comb over itinerary and ensured daily tasks were always accomplished.
- Supported kitchen staff in prepare the dining room for lunch and dinner for over 70 girls in the house.
- Interacted positively with over 300 members and staff throughout each semester ensuring all needs were met.

EDUCATION

The Georgia Institute of Technology – February 2020-August 2020

Atlanta, GA

Professional Education Program – Certificate in Coding

- Six-month immersive coding bootcamp covering MERN full-stack development.
- Used hosting platforms such as GitLab, GitHub, and Heroku to pull and push work as well as display applications.
- Covered both client-side and server-side JavaScript such as jQuery, Moment, React, Express and Node.
- Covered database systems such as MongoDB and MySQL, among others.
- Completed 3 group projects using Agile, communicating daily via google hangouts as well as using Trello boards to track progress.
- Completed over 20 individual assignments and projects while hosting my deployed applications on GitHub.

University of Georgia – August 2015-May 2020

Athens, GA

Bachelor of Science in Biology
